## Braco's Floating Ball

### This ball really floats!

**B**raco's Floating Ball surpasses its predecessors in many ways. Norm Nielsen was one of the first privileged to see Braco's Floating Ball in action. And what he had seen only within some inches away left a very strong lasting impression! What's so new about this floating ball? Well, the most important fact is that it really levitates! No, there are no "tacky" motions while the ball is in midair. The ball does not slide on any attachments, is not dancing on a Zombie gimmick, nor is it covered with any cloth or other object to hide anything.

One of a thousand possibilities for a demonstration of B.F.B.:

**T**he performer opens a chest and takes a large silver gleaming 15 inch ball out of it. He takes his hands off the ball and it mysteriously remains suspended in midair! The performer walks away from the ball which still stays in its place in the middle of nowhere! The ball then suddenly floats away, while the magician walks towards it. The performer passes by the ball and the ball then follows in the same direction as its master! The ball can then descend into a box, which is only some inches bigger than the ball itself. To prove the weight of the gleaming ball the magician takes it out and drops it. The ball crashes with a loud sound on the stage floor. Yes, it weighs 10 pounds!!!

#### The 3 most astonishing facts are:

- Braco's Floating Ball has absolutely no minimum performing distance!
  - Perform it under full lightning! (100.000 Watts of light...)
  - Read it twice, three, four, five... a thousand times: There is nothing (!) attached to Braco's Floating Ball!
- (We really mean absolutely nothing: No wires, no threads, nothing at all! Nevertheless, B.F.B. is always under your control at all times!)

#### Other important points to know about Braco's Floating Ball:

- There are no restrictions to where the ball floats to!
- No assistant is needed!
- No cover of any kind is needed!
- The performer can walk as far away as he wants from the floating ball. (Even miles...)
- BFB - can be performed in your living room, your kitchen, on a big stage or even in a bar!
- The ball used for BFB is totally round and no openings etc. can be seen from any side! (Neither from front, back, top or bottom)
- If you are surrounded by spectators, then BFB is the ideal levitation!
- The color of BFB can be changed from gold or silver or any other color to fit your specific performance.

#### The most important thing to know about B.F.B. is the following:

1. A lot of time and about \$50 have to be invested to perform Braco's Floating Ball. After you purchased the necessary props each BFB can be "manufactured" at a really low base.
2. If there is a time-lapse of more than three days between performances, a new ball would have to be constructed, as you might not be able to use the first model again.
3. BFB is relatively easy to perform. However, we do not recommend it for beginners, children or people not willing to spend the time in perfecting this miracle.

The BFB manuscript can also be downloaded directly at:
