

BRACO'S MIRACLE ROPE GIMMICK

The ingenious combination of two principles!
Lifts your cut & restored rope-magic into a new dimension!

The gimmick can be easily used with standard magician's rope, available at your magic dealer.

Cut a rope into two pieces.
Show both ends wide apart. Place the ends together
and the rope automatically and visually melts together while your fingers
are wide apart! Spectators can pull on the rope, thus proving it is solid again!
Use it also for routines with a knot that can be opened and
moved to different places on a rope!
