

Werry's **PEN SATION**

Secretly obtain written information from a spectator!

Works with
any word,
number,
geometrical
shape etc.!

Hand a pen and a notepad to a spectator and ask him to think of any easy geometrical shape, like a star, a circle or something similar. He is then instructed to note it down on the paper. Then the spectator is asked to draw other geometrical shapes on the paper, so that the first thought-off shape can not be determined. Even though you were turned away you can immediately name the correct shape that was drawn first!

Use any pen! Use any paper! Everything can be examined at any time!
